The Patient Protection and Affordable Care Act of 2010 (the “ACA”) requires that “non-grandfathered” insured and self-insured group health plans and individual insurance policies provide full coverage, with no cost-sharing for the member, for certain preventive care services that members receive from participating providers. The ACA defines preventive services to include for covered adults and children, as applicable, certain annual or periodic exam, screening, counseling and immunization services, and, for women with reproductive capacity, certain contraceptive methods and related counseling.

These preventive services are described in the United States Preventive Services Task Force (USPSTF) A and B recommendations, the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control (CDC), the Health Resources and Services Administration (HRSA) Guidelines including the Health and Human Services (HHS) Health Plan Coverage Guidelines for Women’s Preventive Services and the American Academy of Pediatrics (AAP) Bright Futures periodicity guidelines.

For fully insured individual, small and large groups, additional preventive services are covered in accordance with applicable state statutes. This coverage also applies to self-insured group plans that are sponsored by governmental entities and political subdivisions.

PURPOSE:

The intent of this clinical policy is to provide guidelines for health care services covered at the preventive, no cost-sharing level of benefit. Coverage of medications at the preventive, no cost-sharing level of benefit are not addressed in this policy.

Please refer to the member’s benefit document for specific information. To the extent there is any inconsistency between this policy and the terms of the member’s benefit plan or certificate of coverage, the terms of the member’s benefit plan document will govern.

POLICY:

Health care services are a covered benefit with no cost-sharing in compliance with the ACA and state mandated requirements.

COVERAGE:

- The services are 100% or fully covered by the plan when they are received from participating providers. The plan’s benefit level will be lower (less than 100%) when these services are received from non-participating providers. Refer to the applicable COC or SPD for the applicable nonparticipating provider benefit level.
- These services are covered services under the plan, and the plan will pay for them only when, at the time of service, the member is eligible for and properly enrolled in coverage, and the member and/or employer have timely paid for your coverage.
- As new recommendations are issued or updated, coverage must commence in the next plan year that begins on or after exactly one year from the recommendation’s issue date.
- Generally, if a preventive service results in follow up treatment for an identified condition or illness, such follow up treatment is not a preventive health care service. Services that are not preventive may be covered as medical care or treatment services under another non-preventive provision of the plan, and subject to the applicable member cost-sharing.

- Coverage and benefits for preventive health care services, and the frequency, method, treatment or setting for them is subject to any limits and exclusions set forth in the applicable certificate of coverage or contract, plan document or SPD, and to the plan's usual policies, processes and requirements.
